Technical Stack & Proficiencies

- Full Stack: TypeScript/Node, React, Vite, Fastify
- DB: SQL, Mongo, Snowflake, Dynamo, Tera
- Testing: Playwright, Cypress, Jest, Mocha, Logs
- AI: Claude Code, Skills, Anthropic-SDK
- CI/CD: Gitlab, Git, Bash, Docker, Build-test-deploy
- OS: macOS, Linux, Arch, Nix, Alpine, Debian
- AWS: EventBridge, Cloudwatch, Lambda, AWS-SDK
- Playwright-MCP, MCP-SDK, Orchestration

Career Experience

Centene

Arlington, Virginia -> Remote

Lead Applications Software Engineer in Test

February 2020 – Present

- Pioneered agentic automated testing workflow orchestration for web frontend utilizing Playwright MCP
- Engineered and iterated on prompts designed to organize and dedupe a bloated test case repository
- Developed and iterated on prompts designed to analyze Jira tickets for adequate test readiness
- Explored and implemented various systems of state management to track agentic testing workflows
- Architected and implemented a system of SQL data mocks to test complicated legacy procedures
- Designed a Cypress/React component automation framework implemented by numerous web teams
- Reduced testing run time by building a framework to move e2e tests to left-shifted component tests
- Built a Playwright framework for FE testing that scales across dozens of brand domains in parallel
- Built a bespoke UI tool to support developers, QAs and PMs using Tauri, React and a little Rust
- Implemented a comprehensive report schema in CI/CD to maximize quality visibility to all parties
- Automated WCAG accessibility static scans and keyboard navigation testing and Deque/AXE scanning
- Drove awareness and implementation of *shift left* automation, component tests and merge gating
- Developed templated CI/CD pipelines in Gitlab with component testing on push & merge, e2e on deploy
- Automated Jira ticket transition: Jira & Gitlab/Github API based on merge & deployment state of code
- Automated testing complex call center flows between Genesys, Dynamo, Cloudwatch, S3 and Snowflake
- Automated testing of member and provider communications utilizing SFTP, Java, Cron and visual testing
- Led teams of test automators across a range of projects touching every part of the web stack
- Mentored dozens of junior developers to foster growth and host brown-bags to raise tool awareness
- Implemented Visual Testing as a safety net solution for catching small issues that are difficult to detect
- Developed and maintained mock data schema for edge case testing and to mask PII during visual testing

FINRA

Rockville, Maryland

Software Development Engineer in Test

April 2018 – January 2020

- Automated end-to-end testing using Java, Selenium, JDBC, and Junit
- Automated SQL regression testing validating data integrity through CRUD ops
- Wrote and executed end-to-end test cases and documented application issues in Jira

Harmonia Holdings LLC.

Blacksburg, Virginia

Quality Assurance Engineer

March 2016 – March 2018

- Acquired Public Trust Clearance with Department of Agriculture
- Automated Testing using Java, Selenium, SQL, JMeter, QTest

Mountain State Information Systems

Radford, Virginia

Software Engineering Intern

June 2015 – March 2016

- Web App development and maintenance: HTML, CSS, JavaScript, PHP, FTP
- Automated cost comparisons and visualized data with Visual Basic Macros

Education

B.S., Computer Science – Radford University – GPA: 3.73

Graduated December 2015
