Full Stack Software Engineer — TypeScript, React, Node

Full stack engineer (TypeScript/React/Node) with a track record of designing developer platforms, shipping a native desktop app (Tauri/Rust), and building internal tools adopted across an engineering org.

Technical Stack & Proficiencies

- **Frontend:** React, TypeScript, Vite
- **Backend:** Node, Fastify
- **Native/Systems:** Rust (Tauri), Swift, Zig
- **DB:** SQL, Mongo, Dynamo
- **Tooling:** Git, Docker, CLI/scaffold design
- **AI:** Claude Code, Anthropic-SDK

Career Experience

Centene

Lead Applications Software Engineer in Test

Arlington, Virginia -> Remote

February 2020 – Present

- Led test automation efforts across Centene's web platform, directly guiding 4-5 engineers at a time (dozens over 6 years) and running recurring technical brown-bag sessions on Git workflows and test tooling.
- Built an agentic pipeline (Playwright MCP) that generates automated test code directly from requirements docs and legacy test cases, including a self-healing layer for broken tests.
- Designed and shipped XP_CYTEST, a reusable component-testing module baked into a self-service `pnpm dlx` project scaffold adopted by 15+ teams and growing, pairing React components with MSW-mocked data for isolated testing.
- Built a Tauri/React/Rust desktop application that orchestrates and visualizes dozens of concurrent multi-system test runs in real time, each with a live per-stage progress indicator.
- Automated Jira ticket-status transitions from GitLab CI events (branch created, MR opened, deploy stages), keeping ticket state accurate without manual updates.

FINRA

Software Development Engineer in Test

Rockville, Maryland

April 2018 – January 2020

- Automated end-to-end testing using Java, Selenium, JDBC, and JUnit.
- Automated SQL regression testing validating data integrity through CRUD operations.
- Wrote and executed end-to-end test cases and documented application issues in Jira.

Harmonia Holdings LLC.

Quality Assurance Engineer

Blacksburg, Virginia

March 2016 – March 2018

- Acquired Public Trust Clearance with the Department of Agriculture.
- Automated testing using Java, Selenium, SQL, JMeter, and QTest.

Mountain State Information Systems

Software Engineering Intern

Radford, Virginia

June 2015 – March 2016

- Web app development and maintenance: HTML, CSS, JavaScript, PHP, FTP.
- Automated cost comparisons and visualized data with Visual Basic macros.

Projects

- **organ-eyes** — CLI tool (TypeScript/Bun) for composing reusable, linkable markdown context fragments into a single document for AI coding assistants — eliminates rewriting boilerplate context per agent session.
- **mousehole** — Native Zig + GTK4 daily-driver tool for Hyprland: screenshots the display (grim/slurp), parses on-screen text, and teleports the mouse cursor to a searched element.
- **jump / hypertile** — Swift daemons porting a Linux tiling-window-manager and keyboard-driven navigation workflow natively to macOS for use behind a corporate firewall.
- **qadashboard** — Web dashboard (TypeScript) tracking QA automation progress, deployed versions, and ticket status across multiple projects.

Education

B.S., Computer Science – Radford University – GPA: 3.73

Graduated December 2015
